

## 7.2.4-5 Homework

Name \_\_\_\_\_

Period \_\_\_\_\_

Date \_\_\_\_\_

As we learn about plate tectonics, density, and earth's layers this week. Your homework is to teach/ share what you learn with two people at home (family members). You can use your science journal to help when you share. After you are done you will interview each person and YOU will fill in their answers. Then they will sign beneath the interview.

### Interview

1. What are some things you learned that you didn't know before?
  
  
  
  
  
  
  
  
  
  
2. What are some things you knew and this reminded you about those things?
  
  
  
  
  
  
  
  
  
  
3. What are questions that you have about what was shared with you?
  
  
  
  
  
  
  
  
  
  
4. What feedback would you give your student about how they taught to help them communicate more effectively in the future?
